

# Wiltshire Community Wind Energy

## Salisbury Meeting 17<sup>th</sup> July

Wiltshire Community Wind Energy are a voluntary group who believe that appropriately sited wind turbines are part of the solution to climate change and long term future energy supplies.

Communities in Wiltshire must play their part – we cannot continue to hope that somebody else will find a solution.

At the time of writing oil prices are at record levels and last year flooding occurred on at almost unprecedented scale in the UK.

There are areas where small wind clusters could be sited in Wiltshire and make a real contribution to our energy needs. Some individual communities are already making good progress and we would like to help if we can.

Our next meeting is in **Salisbury** at the United Reformed Church, Fisherton Street on 17th July 2008
